

Anagha C

Kasaragod, Kerala, India | anagharajeevan272@gmail.com | LinkedIn | Portfolio

SUMMARY

MSc Data Analysis & Computational Science student at Digital University Kerala with hands-on experience in machine learning, data science, and frontend development. Skilled in Python, Power BI, Tableau, and parallel computing (MPI in C and Python). Completed a Data Science & ML internship building end-to-end analytical pipelines. Certified Google Cloud Professional Cloud Architect. Passionate about applying AI and data-driven techniques to solve large-scale, impactful problems.

EDUCATION

Digital University Kerala

Master of Science – Data Analytics in Computational Science

Amrita Vishwa Vidyapeetham

Bachelor of Computer Applications – Data Science

Govt. Higher Secondary School, Uppilikai, Kasargod

Higher Secondary – Bio-Mathematics (Plus One & Plus Two)

Kerala, India

July 2025 – July 2027

Kerala, India

September 2022 – May 2025

Kerala, India

June 2020 – March 2022

EXPERIENCE

Infotact Solutions

Data Science & Machine Learning Intern

Kerala, India

June 2025 – August 2025

- Designed and implemented end-to-end supervised ML pipelines using Python (scikit-learn, pandas, NumPy) for classification and regression tasks, achieving measurable improvements in prediction accuracy.
- Performed full data preprocessing workflow: data cleaning, encoding, feature selection, feature engineering, and train-test splitting on real-world datasets.
- Evaluated model performance using accuracy, precision, recall, and F1-score; iterated on hyperparameters to optimize results.
- Built and interpreted data visualizations to communicate analytical findings to stakeholders and mentors.

CODTECH Internships

Frontend Web Developer Intern

Remote

January 2025 – February 2025

- Built responsive, cross-browser-compatible web interfaces using HTML5, CSS3, and JavaScript, improving UI performance and user experience.
- Implemented interactive UI components and collaborated with the team using GitHub for version control and code review.

PROJECTS

EcoSort – Waste Classification Using Deep Learning | GitHub

2025

- Built and benchmarked deep learning models (MobileNetV2, EfficientNet-B0, ResNet-50, YOLOv8, Swin Transformer) for automated waste image classification; compared accuracy and inference performance across architectures.
- Tech: Python, TensorFlow, PyTorch, YOLOv8, EfficientNet, ResNet, MobileNet, Jupyter Notebook

Bio-AI Semantic Search Engine – Biomedical Text Mining | GitHub | Live

2026

- Curated and preprocessed 2,291 biomedical abstracts (BioASQ); built a semantic search engine using Sentence-Transformers with Bio-NER tagging (genes & diseases) in a 4-person team, deployed live on Streamlit Cloud.
- Tech: Python, NLP, Sentence-Transformers (multi-qa-mpnet-base-dot-v1), BioASQ, Streamlit, CI/CD

Human Activity Recognition | GitHub

2025

- Implemented a multi-class activity recognition system on sensor data using supervised ML classifiers; performed feature extraction, preprocessing, and model evaluation for real-time activity detection.
- Tech: Python, scikit-learn, pandas, NumPy, Jupyter Notebook

Wildfire Risk Classification from Satellite & Weather Data | GitHub

2025

- Built a classification model to predict wildfire risk levels by combining satellite imagery features and meteorological data; applied ensemble methods and evaluated with precision, recall, and F1-score.
- Tech: Python, scikit-learn, pandas, NumPy, Matplotlib, Jupyter Notebook

TECHNICAL SKILLS

Languages: Python, C (MPI), SQL, JavaScript, HTML, CSS

ML & Data Science: scikit-learn, pandas, NumPy, Matplotlib, Seaborn, Supervised Learning, Feature Engineering, Statistical Modeling

Data Visualization & BI: Microsoft Power BI, Tableau

Cloud: Google Cloud Platform (GCP), Cloud Architecture, BigQuery

Tools & Frameworks: GitHub, Git, Jupyter Notebook, VS Code, Microsoft Excel

Competencies: Data Preprocessing, Model Evaluation, Parallel Computing, Project Management

Soft Skills: Analytical Thinking, Problem Solving, Team Collaboration, Adaptability

CERTIFICATIONS

- Google Cloud Certified Professional Cloud Architect
- Databases and SQL for Data Science with Python – IBM / Coursera
- Microsoft Power BI – Data Visualization & Reporting
